

This document is prepared in this flow:

Core Flow > UX > Experience > Brand

LAYER 1 — CORE FLOW (MAIN ROOM + BREAKOUT ROOM)

This is the priority layer. If these flows do not work properly, the event experience breaks.

Fix 1: Event Flow (Main Room ↔ Breakout Rooms)

Steps:

1. Run an event with multiple rounds
2. Complete one round
3. Observe what happens immediately after the round ends

Pass if:

- Users return to the main room cleanly after each round
 - No one gets stuck in a dead state
 - No unnecessary delay happens before they come back
 - The transition feels direct and controlled
-

Fix 2: Remove Break Between Rounds

Steps:

1. Run an event
2. Complete a round

3. Observe the time between the end of one round and the start of the next

Pass if:

- There is no forced waiting period between rounds
 - The host can start the next round immediately
 - The system does not hold users in an unnecessary delay state
-

Fix 3: Post-Rating Instant Return

Steps:

1. Run an event and complete a round
2. Submit ratings

Pass if:

- User returns to the main room immediately after submitting ratings
 - There is no 25-second or 30-second wait
 - Rating submission does not slow down the event flow
-

Fix 4: “Wrapping Up” State

Steps:

1. Complete the final round of an event
2. Observe the host view and participant view after the round ends

Pass if:

- The host is not blocked by a frozen “Wrapping up” state
 - The host can still send final messages, guide users, or close the event properly
 - The event does not feel stuck at the end
-

Fix 5: Host Control (Breakout Rooms)

Steps:

1. Start a live session
2. Create breakout room activity
3. Try moving participants between rooms during the session

Pass if:

- Host and co-host can move participants between breakout rooms at any time
 - This works smoothly during the live session
 - Host can fix mismatches or reassign people without breaking the event
-

Fix 6: Lobby Camera & Mic Check

Steps:

1. Join the event lobby before the event begins
2. Turn the camera off and on again
3. Turn the mic off and on again

Pass if:

- Camera and mic both work reliably in the lobby
 - If a user turns camera off and turns it back on, the camera still works properly
 - Users can fully test their setup before entering the event
-

Fix 7: Main Room Label

Steps:

1. Enter the main room during an event

Pass if:

- Only “Main Room” is displayed
 - “Host is preparing your match” is removed
 - The room label is simple, clear, and not distracting
-

Fix 8: Breakout Room Naming

Steps:

1. Join breakout rooms during an event
2. Observe the labels shown in the room and during transitions

Pass if:

- Rooms are labeled clearly, such as Room 1, Room 2, etc.
 - “byebye round” or similar wording is removed
 - The naming feels neutral and easy to understand
-

Fix 9: Invite Accept Navigates to Destination

Steps:

1. Accept a pending invite from the Invites page or notification bell

Pass if:

- User is taken directly to the relevant pod or event page
 - No incorrect redirect happens
 - If already a member, a clear message appears and navigation still happens
-

Fix 10: Invite Accept Guarantees Registration

Steps:

1. Accept an event invite
2. Open the event page

Pass if:

- User is automatically marked as “Registered”
 - User can join the event without having to register again manually
 - Accepting the invite completes the flow properly
-

Fix 11: Unregister Actually Works

Steps:

1. Register for an event
2. Click “Unregister”
3. Confirm the action

Pass if:

- User is immediately unregistered
 - “Registered” badge disappears
 - “Register” button comes back right away
 - This works consistently in all event states
-

Fix 12: Leaving a Breakout Room Returns User to Main Room

Steps:

1. Join a breakout room
2. Leave the room before the round ends

Pass if:

- User returns to the main room directly
 - User is not left in a confusing intermediate state
 - The system handles the exit cleanly
-

Fix 13: Remaining Participant Should Not Be Left Alone in a Broken State

Steps:

1. Place two users in a breakout room
2. Have one participant leave early

Pass if:

- The remaining participant is not stranded alone in a confusing room state
 - They are returned to the main room or handled clearly
 - The system does not leave the user waiting pointlessly
-

Fix 14: Duplicate Matches Within the Same Event Should Be Prevented

Steps:

1. Run a multi-round event
2. Track participant pairings across rounds

Pass if:

- Users are not matched with the same person again in the same session unless there is no other valid option
 - Matching logic avoids repeated pairings as much as possible
 - The event feels varied and intentional
-

Fix 15: Host Status Must Be Accurate

Steps:

1. Start an event as host
2. Join as participant from another device
3. Observe what participants see

Pass if:

- Participants do not see incorrect messages like “host is offline” when host is present
 - The host presence state remains accurate throughout the event
-

Fix 16: Rematch Must Actually Work

Steps:

1. Run an event
2. Use the rematch option as host

Pass if:

- Rematch triggers a real matching action
 - It does not do nothing or leave users stuck
 - Host gets a clear result from the action
-

Fix 17: User Can Leave and Rejoin Event

Steps:

1. Join an event
2. Leave the event from one device
3. Attempt to rejoin the same event

Pass if:

- Registered participants can rejoin the event without trouble
 - Rejoin works on both desktop and mobile
 - Leaving once does not block access to the event
-
-

LAYER 2 — UX / INTERACTION

This layer is about clarity, controls, usability, and live interaction quality.

Fix 18: Notification Bell on Mobile

Steps:

1. Open the app on mobile
2. Hard refresh
3. Tap the bell icon

Pass if:

- The notification panel opens properly as a bottom sheet
 - It is fully visible and tappable
 - It closes cleanly when tapping outside the panel
 - It does not overlap in a way that blocks interaction
-

Fix 19: Invites Page — Pending Invites on Top

Steps:

1. Go to the Invites page
2. Make sure a pending invite exists

Pass if:

- Pending invites appear at the top of the page
 - They are shown before the “Create Invite” section
 - Important actionable invites are not buried below other content
-

Fix 20: Pod Invite Tracking for Directors

Steps:

1. Open a pod as director
2. Check invite and member statuses

Pass if:

- Tabs are visible with counts such as All, Active, Pending Approval, Invited, Declined, Left, and Pending Invites
 - Each tab filters the list correctly
 - Counts are useful and reliable
-

Fix 21: Pod Status Tabs

Steps:

1. Open a pod
2. Switch between tabs

Pass if:

- Member list updates correctly when tabs are changed
 - “All” shows everyone
 - Counts remain accurate
-

Fix 22: Pod Creation Flow

Steps:

1. Create a pod

Pass if:

- User is taken directly into the new pod
 - User is not dropped back to the full pod list
 - The flow feels complete instead of interrupted
-

Fix 23: Profile Data Not Displaying

Steps:

1. Register or complete profile details
2. Open the profile page

Pass if:

- Entered data is visible and saved correctly
 - Profile reflects the user’s submitted information
 - The user does not feel like their information disappeared
-

Fix 24: Navigation (Mobile — Chat to Meeting)

Steps:

1. Enter chat on mobile during a live event
2. Try to return to the meeting

Pass if:

- There is a clear and simple path back to the live meeting
 - User does not get stuck in chat
 - Navigation feels obvious and not hidden
-

Fix 25: Reactions (Interaction Quality)

Steps:

1. Join a live session
2. Use reactions during the session

Pass if:

- Hand raise and reactions behave consistently, similar to Zoom or Google Meet
 - Placement and visibility feel familiar and stable
 - Reaction behavior does not feel random or unclear
-

Fix 26: Breakout Room Reactions Stay Private to That Breakout Room

Steps:

1. Put users in separate breakout rooms
2. Send reactions from inside one breakout room
3. Observe what is visible in the main room and in other breakout rooms

Pass if:

- Reactions sent inside a breakout room are only visible inside that breakout room

- The host or other users outside that room do not see them globally
 - Breakout room privacy is maintained
 - Reactions do not leak across the event
-

Fix 27: More Reaction / Emoji Options

Steps:

1. Open the reaction menu during a live session

Pass if:

- Users have more than just a minimal set of reactions
 - Reactions feel expressive enough for a live social/video setting
 - The options support a more human and enjoyable interaction style
-

Fix 28: Chat Emoji Support

Steps:

1. Open chat
2. Try sending emojis directly

Pass if:

- Users can send emojis directly in chat
 - No workaround is needed
 - This works consistently across devices
-

Fix 29: Mobile Self-View and Live Controls Are Usable

Steps:

1. Join an event on mobile
2. Observe self-view and meeting controls during the session

Pass if:

- Self-view is placed properly and does not feel awkward
 - Basic controls remain accessible during the session
 - Mobile use feels practical during a real event
-

Fix 30: Matching / Waiting Message Should Not Take Over the Full Screen

Steps:

1. Enter the main room during matching
2. Observe what the participant sees while waiting

Pass if:

- Matching or waiting status appears as a light message or top banner
 - Participant can still see themselves and remain oriented
 - The screen does not feel blocked or alarming
-
-

LAYER 3 — EXPERIENCE

This layer is about how smooth, stable, and enjoyable the product feels in real use.

Fix 31: Overall Flow Smoothness

Steps:

1. Run the full event flow from start to finish

Pass if:

- The event feels smooth and uninterrupted
- No heavy pauses, random delays, or awkward interruptions happen

- The product supports the flow instead of slowing it down
-

Fix 32: Login Screen Flash

Steps:

1. Log into the app

Pass if:

- No black screen flash appears during loading
 - The transition into the dashboard feels clean and polished
 - The background remains visually consistent
-

Fix 33: Mobile Experience — Layout

Steps:

1. Join a session on mobile
2. Test the main room, breakout room, and transitions

Pass if:

- Self-view appears at the top
 - Menu is accessible in breakout rooms
 - Layout remains stable across the live experience
-

Fix 34: Background Controls (Video)

Steps:

1. Join a video session
2. Try changing camera background settings

Pass if:

- User can blur the background
 - User can set a custom background image
 - These features work cleanly and feel built-in, not broken or partial
-

Fix 35: Rating Flow Should Feel Clean and Not Repetitive

Steps:

1. Meet participants in a round
2. End the round and submit ratings

Pass if:

- Rating appears once where relevant
 - User is not asked to rate the same interaction twice
 - Rating flow is simple and does not interrupt the event more than needed
-

Fix 36: Rating Must Work Properly on Mobile

Steps:

1. Join an event on mobile
2. Complete a round
3. Wait for rating to appear

Pass if:

- Rating appears on mobile when it should
 - User can complete rating without missing the flow
 - Mobile users are not skipped or broken in the rating step
-
-

LAYER 4 — BRAND

This layer is about visual alignment, trust, and making the product feel cohesive.

Fix 37: Main Room Background Color

Steps:

1. Enter the main room

Pass if:

- The background is white
 - It feels aligned with the rest of the product and brand direction
-

Fix 38: Announcement Banner (Main Room)

Steps:

1. Trigger or view an announcement in the main room

Pass if:

- The banner uses the brand red color
 - It feels intentional and visually aligned with the brand
-

Fix 39: Brand Color Alignment

Steps:

1. Review UI across the app, especially core event screens

Pass if:

- Colors feel consistent across the product
 - Primary red, white background, and supporting accents are aligned
 - The app does not feel visually mixed or inconsistent
-

Fix 40: Favicon

Steps:

1. Open the app in a browser tab

Pass if:

- The favicon appears centered and visually balanced
- It looks clean on both left and right edges
